

SENDING A CAPSULE STUDY

For Given Imaging PillCam®, using your capsule workstation

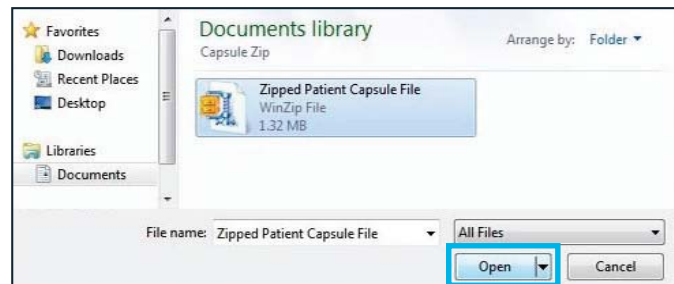

- 1 Plug a thumb drive (at least 4GB capacity) into your workstation's USB port.
- 2 Find the correct patient folder in **Data E:\videos**. Copy the entire folder to your thumb drive.
- 3 Move the thumb drive to a computer with internet access.
- 4 Right-click the patient folder on the thumb drive, and select **Send To > Compressed (zipped) Folder**. (We recommend you create a dedicated "Capsule Zip" folder on your computer so your studies are easy to find.)

- 5 Go to **MDLGI.com** and log in.
- 6 Select **Click Here to Upload a Study**.
- 7 Fill out the form.
- 8 Click **Select File**.

- 9 Find your zipped patient file and click **Open**.

- 10 Click **Send Capsule Read Request** and — this is IMPORTANT — wait until you receive a report number (see next step).

- 11 Watch the live status bar. You must wait for your file to upload completely. When it's done, you'll be automatically redirected to a page where you'll receive a report number. This is your assurance that the file has been successfully uploaded. Once you see the report number, it's safe for you to upload another study, return to the home page, or log out.

Thank you. Your capsule read request has been sent. The Med DataLink record number for this report is 180.

You will be notified automatically via e-mail when your completed report will be ready for you to download from our website.

SENDING A CAPSULE STUDY

For Given Imaging PillCam®, using your capsule workstation

- 1 Plug a thumb drive (at least 4GB capacity) into your workstation's USB port.
- 2 Using the Rapid Study Manager, select the relevant study and click **Export**.
- 3 Select either **Entire study** or **Specific files** under "Select content to export." (If you choose **Specific files**, a window opens inside the screen showing the files for selection.)
- 4 If you want to de-identify the video in the study, select the checkbox **De-identify** at the bottom of the screen. The report, however, will not be de-identified.
- 5 Click **Next**.
- 6 Select **Zip file** under "Select destination" and click **Next**. The "Save As" screen will appear.
- 7 If necessary, browse for a location and click **Save**. (We recommend you create a dedicated "Capsule Zip" folder on your computer so your studies are easy to find.)
- 8 The "Study Zip" screen appears. When the progress bar is complete, click **Close**.
- 9 Find the correct patient folder in **Data E:\videos**. Copy the entire folder to your thumb drive.
- 10 Move the thumb drive to a computer with internet access.
- 11 Right-click the patient folder on the thumb drive, and select **Send To > Compressed (zipped) Folder**. (We recommend you create a dedicated "Capsule Zip" folder on your computer so your studies are easy to find.)
- 12 Go to **MDLGI.com** and log in.
- 13 Select **Click Here to Upload a Study**.
- 14 Fill out the form.

- 15 Click **Select File**.

- 16 Find your zipped patient file and click **Open**.

- 17 Click **Send Capsule Read Request** and — this is IMPORTANT — wait until you receive a report number (see next step).
